

Hello!

We are in your neighborhood doing a tree removal project, and I wanted to offer a free safety assessment of any trees or limbs around your property that you are worried about.

Now is a great time for tree removal and/or pruning for two reasons:

1. Removing dangerous trees/limbs during the winter is best practice in order to avoid any property damages. With the wind and snow testing the trees' integrity, it's a good time to evaluate.

2. It is a relatively slow time of year for us so prices are more competitive than any other time of the year. So any projects you've been thinking about, let's get it done.

Shoot us a call or text at 978-570-8277 if you have any concerns or questions about the integrity of surrounding trees. We have a ton of availability to run around and do assessments while we're here!
